Education

Egyptian Chinese University (ECU)
Bachelor of Engineering in Software Engineering — Data Science Specialization

Sep 2023 – Oct 2028
CGPA: 3.87 / 4.0

Experience

Data Analyst Intern — National Telecommunication Institute (NTI)

Aug 2025 – Sep 2025

- Completed a 120-hour intensive internship focusing on data analysis, visualization, machine learning and reporting.
- Applied Python, Pandas, and Scikit-learn to preprocess datasets, perform feature engineering, and build predictive models.
- Developed Power BI dashboards to visualize KPIs and integrated results from ML models for decision support.
- Collaborated on end-to-end data pipelines, including data cleaning, transformation

Projects

1. Multi-Disease Detection System — Healthcare System

- Designed and deployed healthcare web application integrating Random Forest Classifier for heart disease risk prediction (~73% accuracy) and CNN model for brain tumor detection (~96% accuracy).
- Conducted data preprocessing, feature engineering, and model evaluation using Kaggle datasets.
- Implemented an end-to-end ML pipeline: data ingestion, training, serialization, and deployment via Flask API.
- Built a secure patient dashboard with automated PDF medical reports and integrated an AI chatbot using Groq API (Llama-3.1).
- Tech stack: Python, Scikit-learn, TensorFlow/Keras, Pandas, NumPy, Flask, SQLite, HTML/CSS/JS.

Github: <https://github.com/MahmoudNagiubX/Multi-Disease-Detection-System>

2. Automobile — Data Analysis Dashboard

- Developed an interactive dashboard to analyze sales and performance metrics using Power BI.
- Performed SQL for data cleaning, trend analysis, and KPI tracking.
- Delivered insights that improved operational efficiency by 15%.

Technical Skills

- Programming & Databases: Python, SQL
- Tools & Platforms: Git, Jupyter, Kaggle, Google Colab
- Deep Learning: TensorFlow, Keras, PyTorch
- Machine Learning: Scikit-learn, Supervised Learning & Unsupervised Learning, Model Evaluation
- Data Engineering & Pipelines: Feature Engineering, Data Cleaning, ETL, Model Deployment (Flask, FastAPI), API Integration
- Core Concepts: Exploratory Data Analysis (EDA), Computer Vision (CNNs), NLP (transformers, embeddings), Model Optimization
- Data Analysis: Pandas, NumPy, Excel
- Data Visualization: Power BI, Matplotlib, Seaborn

Certifications

- Machine Learning Specialization — Coursera (DeepLearning.AI & Stanford Online)
- Deep Learning Specialization — Coursera (DeepLearning.AI)
- AI & Machine Learning Program — Sprints & Microsoft
- Python Fundamentals & Python for Data Analysis — DataCamp
- Data Analytics — National Telecommunication Institute (NTI)
- Data Analytics Intern — Elevvo

Additional Information

- Languages: English, Arabic
